

Sanchezner Orange

(561) 685-3794 | sanchezner.orange@gmail.com | sanchezner.com | github.com/sanchezner

Education

University of Florida

Expected Dec 2027

B.A in Computer Science

Relevant Coursework: Machine Learning, Database Systems, Data Structures and Algorithms

Experience

Research Intern

Jan 2026 – May 2026

UF Data Studio

Gainesville, FL

- Built ETL pipelines in Python to process 300+ YouTube transcript segments into labeled prediction datasets
- Improved label reliability by orchestrating a 3-model LLM ensemble via the Groq API with majority-vote logic
- Automated sentence normalization with Regex, standardizing input across the pipeline

Backend Subteam Lead

Sep 2025 – Dec 2025

Google Developer Groups (UF Chapter)

Gainesville, FL

- Led a subteam of 9 to build 9 REST API endpoints for a campus marketplace in Node.js and Express
- Engineered session-based auth middleware enforcing ownership access control across all protected routes
- Implemented Sequelize ORM keyword search, enabling title-based item filtering across the platform

Projects

Paid to Play – NBA Valuation Analysis | *Python, PostgreSQL, AWS S3, MLflow, Prefect, Docker, React*

- Deployed a live pipeline scoring 400+ players daily via Dockerized Prefect workers running on a VM
- Built a bronze/silver/gold Postgres pipeline ingesting 25+ seasons of game logs with point-in-time snapshots
- Trained XGBoost BPM projector (0.78 test R2) with MLflow registry and test-based promotion gates
- Automated daily batch scoring, serving 26K+ daily predictions as static JSON to a React frontend

Attest – Contract-Based Data Observability Platform | *Python, FastAPI, PostgreSQL, Neon, React*

- Built a contract-based observability platform detecting missing, stale, and invalid pipeline artifacts
- Developed a Python SDK enabling pipeline workers to report artifact health through authenticated APIs
- Automated scheduled health checks with persisted status history and alerts on state transitions

Ball Don't Lie – NLP-to-SQL NBA Referee Search Engine | *Python, PostgreSQL, AWS S3, Airflow*

- Built an NLP query system for NBA referee bias analysis across 600+ referees and 12+ metrics
- Automated robust Airflow pipelines ingesting 1M+ NBA records with checkpoint recovery through 20+ seasons
- Fine-tuned a DistilBERT model to classify query intent with 92% accuracy for dynamic SQL generation
- Implemented a S3-backed model versioning and training pipeline to iteratively improve intent classification
- Designed a multi-stage query resolver using sentence transformers to filter metrics by entity compatibility

Skills

Languages: Python, C++ , JavaScript, TypeScript, SQL, HTML/CSS

ML/MLOps: PyTorch, scikit-learn, MLflow, Apache Airflow, Prefect, Databricks, dbt, Apache Spark

Cloud & Infrastructure: AWS (S3, SageMaker, Redshift), GCP (BigQuery), Docker, Kubernetes, CI/CD

Libraries/Tools: pandas, FastAPI, Git, GitHub Actions
