Education

University of Florida – Bachelor of Arts in Computer Science (GPA: 3.3/4.0)	Expected May 2027
Palm Beach State College – Associate of Arts in Liberal Arts (GPA: 3.7/4.0)	Dec 2024

Skills

Languages: Python, SQL, C++, JavaScript, HTML/CSS

Cloud: Amazon Web Services (S3, RDS), Google Cloud Platform (BigQuery)

Libraries/Tools: Apache Airflow, PySpark, dbt, Pandas, PyTorch, FastAPI, Power BI, Git

Projects

Ball Don't Lie (In Progress) | *Python, Airflow, PostgreSQL, AWS S3* github.com/oh-nought/ball-dont-lie

- Building an NLP query system for NBA referee bias analysis across 600+ referees and 12+ metrics
- Automated robust Airflow pipelines ingesting 1M+ NBA records with checkpoint recovery across 20+ seasons
- Fine-tuned a DistilBERT model to classify query intent with 90%+ accuracy for dynamic SQL generation
- Implemented S3-backed model versioning and training pipeline to iteratively improve intent classification
- Designed a multi-stage query resolver using sentence transformers to filter metrics by entity compatibility

Radxa Monitor | *Python, C++*

github.com/oh-nought/radxa-monitor

- Engineered a multi-threaded ETL pipeline streaming hardware telemetry via UNIX sockets with <10ms latency
- Implemented anomaly detection algorithms (EWMA, Z-score statistical thresholding) on streaming metrics to surface data quality issues and system degradation
- Built an asynchronous FastAPI aggregation layer serving real-time data via WebSockets, reducing overhead by 40% compared to standard HTTP polling

LANdToss | *Python, SQLite, FastAPI, WebSockets*

github.com/oh-nought/LANdToss

- Architected a chunked streaming pipeline enabling 5GB+ file transfers on 1GB RAM small-board server, reducing memory footprint by 99%
- Developed a stateful connection manager using SQLite to track transfer lineage across concurrent users
- Implemented custom WebSocket protocol, reducing data payload size by ~ 25% to optimize bandwidth

Involvement

UF Google Developer Student Club (GDSC) | *Student Developer*

Sep 2025 – Present

- Engineered backend data access layers for a campus bartering platform, enforcing user-level data isolation and privacy constraints across all read/write operations
- Developed CRUD endpoints that strictly validated data ownership and transaction integrity

UF Data Science & Informatics Club (DSI) | *Member*

Sep 2025 – Present

- Participated in workshops covering data visualization in Power BI and cloud computing for scalable and automated data pipelines

Work Experience

Grocery Clerk, Publix – Gainesville, FL

May 2023 – Dec 2025

- Collaborated with a team to manage inventory operations efficiently while delivering premier customer service
- Earned Exceeds Expectations performance evaluations for reliability and commitment to team objectives
